Student Thriving Index

Updated August 2021

The Student Thriving Index is a tool for the formative assessment of student social, emotional, academic, and physical well-being. Character Lab founder and CEO Angela Duckworth developed this tool with support from researchers on our network and feedback from Character Lab school partners. Input from educators and students helps to encourage student participation and create content aligned with their needs.

Repeated participation allows schools and organizations to monitor student well-being topics such as sleep habits, social media use, and sense of belonging. The Index results are shared through live, customized, easily accessible dashboards. School staff, district leaders, or organizational leaders can act on the results by identifying areas for improvement and sharing relevant resources to support their students.
